Subject: How EZ-Clean helped me

Dear Kenny,

In September 2009, at age 49, I received a permanent colostomy after being diagnosed with colorectal cancer. I was sent home from the hospital with a one and two piece system recommended by my colostomy nurse. It didn't take long to realize that emptying my pouch was quite barbaric. I contacted every manufacturer I could find so they could send me samples of their products. My anticipated excitement on receiving these samples was quickly diminished. Every sample I received was basically identical in the way they worked. I was now starting to believe I was heading for a life of daily misery.

I decided I needed to attend a local NOAA meeting for advice. The members were very helpful and gave me a sample of the magazine "The Phoenix". When I saw your ad, excitement started to build in me once more. Your product arrived just as advertised. It was extremely simple to setup, but most importantly, it worked! Without a second thought, I immediately packed up every manufacturers product I tried, and replaced them with yours. I was so excited with your EZ-Clean system that I bought additional ones to give out for others to try. They were just as excited as me!

This system is quick and completely clean with no more squeezing your appliance like a toothpaste container, and then trying to remove any waste without getting it on you. You sit on the commode, open your pouch, insert your water pistol into the valve and squeeze the trigger. Within seconds your appliance is restored to, "just out of the box" condition, completely cleaned and ready to be closed. Believe me when I say, "This system is a no brainer"!

Kenny, thanks for making my life a whole lot better, and be assured I am here to help spread the word on your system!
